

FATHIMA SARA SHUMS

Software Engineer — Full-Stack (React · Node.js · CRUD APIs)

0740580844 • fathimashums.2005@gmail.com • [linkedin.com/in/fathima-sara-shums](https://www.linkedin.com/in/fathima-sara-shums) • github.com/FathimaShums • Colombo, Sri Lanka
Portfolio: fathimashums.github.io/FathimaSaraShums.github.io

PROFILE

BSc (Hons) Computer Science graduate (First Class Honours) with an active GitHub portfolio of independently built full-stack and mobile projects spanning React, Node.js/Express, and Flutter. Built full CRUD REST APIs and connected them to web and mobile frontends across three end-to-end projects — an e-commerce analytics platform (MongoDB/Express/React/Node), a food-ordering platform (Figma-designed React web app, Laravel API, and a Flutter mobile app on the same backend), and AeroLink, an AWS-hosted microservices system. Comfortable working independently and end-to-end, from UI to APIs to deployment. New to TypeScript, Next.js, and React Native specifically, with directly adjacent JavaScript, React, and Flutter experience, and no formal experience yet using AI coding tools in a professional workflow. Seeking a Software Engineer role.

TECHNICAL SKILLS

Frontend	React.js, JavaScript (ES6+), Tailwind CSS
Mobile	Flutter (Dart)
Backend	Node.js, Express.js, Laravel (PHP), CRUD REST APIs, HTTP, JSON
Databases	MongoDB, MySQL, PostgreSQL, AWS DynamoDB
Cloud & Tools	AWS, Docker, Git (branches, PRs), Postman, Agile/Scrum

KEY PROJECTS

NoSQL E-Commerce Analytics System (MERN) — *MongoDB · Express.js · React.js · Node.js*

github.com/FathimaShums/home-decor-ecommerce

- Built full CRUD REST APIs in Node.js/Express.js for products, orders, and users, connected to a React frontend consuming JSON over HTTP.
- Designed 8 aggregation pipelines over MongoDB's document model to power a real-time analytics dashboard, with JWT authentication and Role-Based Access Control.

Zaytun's — Full-Stack Food Ordering Platform (Web + Mobile) — *React · Tailwind CSS · Figma · Laravel · Flutter*

github.com/FathimaShums/Zaytun_SSP2 (web) • github.com/FathimaShums/Zaytun-sMobileApp (mobile)

- Built full CRUD REST endpoints (auth, food items, categories, cart, checkout, guest orders) consumed by both a React + Tailwind web frontend and a Flutter mobile app on the same backend.
- Designed the UI/UX in Figma before development; implemented role-based access for customers, employees, and delivery staff.

AeroLink — Cloud-Native Airline Management Platform — *Node.js · React · AWS · Docker*

github.com/FathimaShums/AeroLink

- Architected a 7-service, event-driven microservices system with REST APIs, JWT-based access control, and a live-updating React frontend, deployed on AWS with Docker and CloudFormation.

ADDITIONAL EXPERIENCE

Data Scientist Intern | *Engenuity AI*

Feb 2025 – May 2025

- Worked directly on client-facing ML pipelines within a professional engineering team, using version-controlled notebooks and reproducible workflows.

EDUCATION

BSc (Hons) Computer Science, APIIT Sri Lanka 2023 – 2026 • First Class Honours (results published; graduating December 2026)

Cambridge A-Levels, Lyceum International School, Panadura Computer Science: A (84) • Mathematics: B (76) • Psychology: B (74) • O-Levels: 6 A*'s, 1 A
